BMS EDUCATIONAL TRUST
Bull Temple Road, Bangalore- 19

A PROFILE

Dharmaprakasha Rajakaryaprasaktha B.M.Srinivasaiah Educational Trust, Bangalore, is a public charitable trust registered in 1957 by the successors of late Sri B.M.Srinivasaiah, an eminent industrialist and philanthropist, who had, among other things, established the BMS College of Engineering in 1946. The great vision of Shri B.M.Srinivasaiah, was to promote higher education for the economic and social advancement of the society. The BMS College of Engineering thus became the first private engineering college to be established in the country. Sri B.S.Narayan, who was B.M.Srinivasaiah's only son, along with his mother and step mother, constituted the Trust in 1957 and guided its affairs till his demise in 1995. During the above period the BMS Educational Trust not only developed the BMS College of Engineering into one of the finest Engineering Colleges in the country, but also established other institutions of higher education including the BMS College of Law, the BMS College for Women and the BMS Evening College of Engineering. After the demise of Sri. B.S. Narayan, the affairs of the Trust and its institutions were managed by a Managing Body appointed by the Hon'ble High Court of Karnataka pending a Writ Petition filed by Smt. Ragini Narayan, W/o. Late Sri. B.S. Narayan. Consequent to issue of orders in Writ Petition No. OS 2680/2000 by the City Civil Court Order dt. 31.07.2009 in favour of Smt. Ragini Narayan the following members have been appointed by Smt. Ragini Narayan, Donor Trustee to the Managing Body of BMS Educational Trust.

AFFIDAVIT

I Dr. S. Venkateswaran, Principal BMS Institute of Technology, Avalahalli, Doddaballapura Main Road, Yelahanka, Bangalore-560064 hereby solemnly declare that members of the staff mentioned in Section 12 of the Compliance report for the year 2009-10 are employed in the institution for teaching for the AICTE approved programme only.

**PRINCIPAL
BMSIT**

ANNEXURE – 3

STRENGTH AND WEAKNESSES OF THE INSTITUTION IN TERMS OF TEACHING METHODOLOGY / TRANSACTION OF SYLLABUS / INNOVATIONS / BEST PRACTICES (IF ANY) / INDUSTRIAL PROJECT / INDUSTRIAL CONSULTANCY / RESEARCH TAKEN UP FOR INDUSTRY AND AMOUNT GRANTED THEREBY

STRENGTHS:

Systematic procedures are being followed and modern teaching aids are used for imparting lectures to students. Two new digital class rooms are being set up. Separate seminar hall is available for lectures and seminars and each classroom can be used as a seminar hall.

Invited lectures and seminars are being regularly held and special training sessions are conducted for the benefit of placement preparation.

Well equipped laboratories and well ventilated class rooms are provided and the entire landscape is such that it provides a clean and environmentally friendly atmosphere for teaching and learning. Special teaching aids (like cut-section models, electrical insulators, wires etc) are available to aid teachers in clarifying mechanisms and principles.

Special machine tools have also been imported, not only for regular class work, but also to enable R&D samples to be fabricated.

The departments of Mechanical Engineering and Mathematics are recognized VTU R&D centres. Currently, three students have registered in the department of Mechanical Engineering.

The teaching staff who have been recruited are a blend of academic and industrial experienced personnel, thereby ensuring that practical aspects are also brought to the students attention. Industry related projects are being taken up. Currently, KSRTC has entered into an agreement with BMSIT and training classes are being held for the KSRTC “hand – picked engineers” in the areas of FEA. Once they get oriented, problems pertaining to dynamic and static analysis of bus body design (rural, urban transport) will be dealt with. At a later stage, these design changes will be incorporated in the production lines. The project is for Rs. 6 lakhs. Similar projects are on the anvil with M/s. CPRI for development of composite materials.

WEAKNESSES

The inherent delays in the admission process and delays in the examination results due to revaluation, retotalling, challenge revaluation etc inhibits the teachers and students during the short duration of our semester systems from imparting and receiving the requisite training. Some clearances (revaluation, retotalling, challenge revaluation) are received only one or two days prior to the examination, causing lot of hardships to the students.

As far the academic aspects are concerned, the teacher is generally required to follow the syllabus guidelines and the test books prescribed for teaching. This actually results in “no academic freedom” situation, as the teacher’s coverage of the subject matter is restricted to the limits already set by the university.

Recruiting and retaining faculty in the departments of Electronics & Communication and Computer Science have been extremely difficult. In fact, recruiting faculty with Ph.D qualification for the posts of Professor & Asst. Professor has become impossible.

As far as industry, AICTE / DST projects are concerned, by far, the industries are not forthcoming with funds and projects for effective industry – university relationships. Perhaps, legalization is the only solution to improve this aspect. Regarding funding from agencies like DRDO / AICTE / DST etc is concerned, it involves laborious paper work and takes a minimum of 6-8 months to achieve results; most often it can be negative. It is not possible for research to wait for grants and also without grants, research is hindered. Perhaps, a certain amount of free flow of funds, with of course, continuous and relevant monitoring, is required to address this problem.
